

REGIONAL JAMBOREE OF THE
SALZBURG SCOUTS

3RD – 13TH AUGUST 2014
BAD HOFGASTEIN

“Root-idea”

During intensive thinking about the concept of the jamboree and a possible name and motto terms like “back to the roots”, “simplicity”, “little technology” or “love of nature” were soon mentioned. Surprisingly soon the direction the jamboree should take was clear for everyone. There will be surely no “Cyber-Tent” on the campsite but at the same time we will not refuse modernity. Thus GPS, mobile phones et cetera will be used sensibly and the electricity for those devices will be produced specifically on the campsite.

Motto shall be: **We want to experience a simple jamboree with friends from all over the world!**

Wurzl'14 – rooted in simplicity!

Variety of programme with focal point “nature”

Main topic at Wurzl'14 is generally the responsible treatment of resources. Based on that, the three age division-subcamps provide a programme appropriate to age.

Besides mutual activities of all age divisions, big events – like the opening ceremony, the visitor's day and the closing ceremony – and one day just for your scout troop, there are of course, according to age, different highlights

Unique experience of nature in Gastein Valley

Save the date!
We are awaiting you!

The history of Gastein dates way back to Celts and Romans, who went through the valley to cross the „Tauern“-mountains and even settled there. Probably they went into raptures about that valley as well, like we still do nowadays. We enjoy the thermal springs and go hiking and skiing. Whilst searching for a suitable campsite for our jamboree we found a real gem: the campsite in Wieden, which is part of Bad Hofgastein! It provides everything a scout could possibly ask for: gentle camping grounds near the Gastein brook, surrounded by the alp huts and mountains of the High Tauern. Reason enough for us to orientate the programme during the jamboree to the “natural supply”. Hikes and trips to the High Tauern will be awaiting us as well as having a good look at Mother Nature and possible ways to treat her responsibly.
